

Managed Services for SAP® Applications on Public Cloud Infrastructure

Public Cloud Services with itelligence

Managed Services for New Business Models

Managed services are gaining popularity for businesses looking to reduce complexity and free up internal resources. In today's market, there is a lot of pressure on IT departments to innovate and become an integral part of business-driving operations. To do so, CIOs must concentrate on alleviating their teams of laborious tasks and create more time for innovation.

Public Cloud Services with itelligence

With our global portfolio from advisory through hosting and application management to delivery services, we help businesses act more flexible and scalable. Managed by itelligence, Public cloud services complement our SAP basis, database and system administration services for SAP® applications. Our integrated service and virtual data center management enables an easier support of business processes and clearer overview of data exchange. With public cloud, you can quickly adopt innovations to new application requirements.

Supporting Your SAP Applications

itelligence offers complete hosting of SAP application system landscapes, including development, quality assurance, and production systems based on individually designed and certified private and public cloud infrastructure. Our experts manage your cloud and help you ensure uninterrupted IT operation through implementing ERP and CRM or cloud solutions from the SAP S/4HANA® suite.

Our services include provisioning for all application layers, SAP application servers, and additional system components such as gateways, Adobe Document Services, and SAP Fiori® front-end apps.

Your Benefits

- Complete technical monitoring and management of SAP Basis components
- Integrated service with virtual data center management and SAP operations
- High-quality service delivery with seamless integration into itelligence Managed Cloud operations
- High availability SLA for business-critical applications
- Flexible public cloud infrastructure
- Seamless integration of public cloud services, itelligence data centers, and on-premise resources
- Management services for virtually all available SAP software products, especially those based on SAP NetWeaver®

itelligence can guide your business through its entire cloud journey. Our specialists have a wealth of experience in cloud projects for customers around the world in various industries. itelligence has gained numerous SAP Cloud Partner awards and has over ten years of experience in cloud computing. Our experts can support you in planning and implementing your cloud strategy, maintaining control of your applications with managed services, and getting the most out of your systems.

Achieve Efficiency Gains

itelligence leverages cloud platforms with Amazon Web Services and Microsoft Azure to support businesses with more flexibility. Test and development systems that are not used all the time are particularly suitable for public cloud and can lead to savings of up to 50%. And even production and disaster recovery environments benefit through rapid provisioning in minutes instead of days. Additionally, optimized storage resources fulfill backup and archiving requirements.

Safe and Secure Cloud Operations

It is important to assess your specific data protection requirements and the security measures offered by your cloud provider. itelligence can advise you on advanced backup, failover, and recovery and provide you with information on data protection policies and certifications.
