

IT - Security

Don't react.
Act proactively.

Fact:
Only **32 %**
of organizations are
capable of responding
effectively to a cyber
incident.*

* NTT Security 2017 Global Threat Intelligence Report (GTIR)

Security Challenges

Does any of these thoughts apply to you?

- My security program does not fit my needs.
- The complexity of the organization makes it hard to put risk into context
- I want to digitalize but I want it to be safeguarded.
- How can I guarantee security across all my system landscape?
- While securing my organization, I also need to meet compliance. How can I achieve that efficiently?
- I don't have the experts for dealing with cyber threats. Who can support me?

What You Need

Develop a security program tailored to your needs.

Are you in the midst of the digital transformation, installing new systems or applications? Your security program shall support the process and keep it secure and low-risk at any time.

Get yourself a service provider who caters for your security.

We combine our SAP applications expertise with NTT Security's in-depth knowledge of IT infrastructure to construct the security program fitting your needs.
