

- **Industry :** Automotive Supplier
- **Number of Employees :** over 500
- **Headquarters :** Kocaeli

**Kanca, supplying one thousand and 500 tones of parts to 300 companies in the key automotive and petroleum industries including Audi, Fiat, Ford, Iveco, Renault, Toyota, Volkswagen and Skoda, gained a competitive advantage over its competitors in capacity and labor force efficiency with our SAP project.**

#### **Applied Solution:**

- SAP ERP

#### **Project Highlights:**

- The project including Production, Sales, Purchasing, Finance, Cost Accounting, Warehouse Management, Change Management, Quality Management, Fixed Asset Management, Plant Maintenance modules was implemented.
- 'Mould Life Cycle Monitorization' program was developed specific for Kanca.
- 'Electronic data Interchange' was applied. (EDI: The automation of trade relations in Kanca's supply chain and to control the work processes on a common system with partners)

#### **Benefits:**

- Kanca started to optimize process flow, access to the data faster, respond to customer needs faster and take the costs under control.
- As a result of process integration with partners, the efficiency of the supply chain increased and production scrap were minimized.
- 'Mould Life Cycle Monitorization' enabled Kanca to monitor mould status and moulds in hand and to make a mould requirement planning.
